## **Claims**

- 1. A method of screening for therapeutic agents useful in the treatment of a disease comprised in a group of diseases consisting of hematological diseases, cardiovascular diseases, disorders of the peripheral and central nervous system, urological diseases, endocrinological diseases and cancer in a mammal comprising the steps of
  - i) contacting a test compound with a GPR14 polypeptide,

10

5

- ii) detect binding of said test compound to said GPR14 polypeptide.
- 2. A method of screening for therapeutic agents useful in the treatment of a disease comprised in a group of diseases consisting of hematological diseases, cardiovascular diseases, disorders of the peripheral and central nervous system, urological diseases, endocrinological diseases and cancer in a mammal comprising the steps of

20

- i) determining the activity of a GPR14 polypeptide at a certain concentration of a test compound or in the absence of said test compound,
- ii) determining the activity of said polypeptide at a different concentration of said test compound.
- 25 3. A method of screening for therapeutic agents useful in the treatment of a disease comprised in a group of diseases consisting of hematological diseases, cardiovascular diseases, disorders of the peripheral and central nervous system, urological diseases, endocrinological diseases and cancer in a mammal comprising the steps of

- 112 -

- i) determining the activity of a GPR14 polypeptide at a certain concentration of a test compound,
- ii) determining the activity of a GPR14 polypeptide at the presence of a compound known to be a regulator of a GPR14 polypeptide.
  - 4. The method of any of claims 1 to 3, wherein the step of contacting is in or at the surface of a cell.
- The method of any of claims 1 to 3, wherein the cell is in vitro.

5

- 6. The method of any of claims 1 to 3, wherein the step of contacting is in a cell-free system.
- 7. The method of any of claims 1 to 3, wherein the polypeptide is coupled to a detectable label.
  - 8. The method of any of claims 1 to 3, wherein the compound is coupled to a detectable label.
  - 9. The method of any of claims 1 to 3, wherein the test compound displaces a ligand which is first bound to the polypeptide.
- The method of any of claims 1 to 3, wherein the polypeptide is attached to a solid support.
  - 11. The method of any of claims 1 to 3, wherein the compound is attached to a solid support.
- 30 12. A method of screening for therapeutic agents useful in the treatment of a disease comprised in a group of diseases consisting of hematological diseases,

cardiovascular diseases, disorders of the peripheral and central nervous system, urological diseases, endocrinological diseases and cancer in a mammal comprising the steps of

5 i) contacting a test compound with a GPR14 polynucleotide,

10

15

- ii) detect binding of said test compound to said GPR14 polynucleotide.
- 13. The method of claim 12 wherein the nucleic acid molecule is RNA.
- 14. The method of claim 12 wherein the contacting step is in or at the surface of a cell.
  - 15. The method of claim 12 wherein the contacting step is in a cell-free system.
- 16. The method of claim 12 wherein polynucleotide is coupled to a detectable label.
- 17. The method of claim 12 wherein the test compound is coupled to a detectable label.
  - 18. A method of diagnosing a disease comprised in a group of diseases consisting of hematological diseases, cardiovascular diseases, disorders of the peripheral and central nervous system, urological diseases, endocrinological diseases and cancer in a mammal comprising the steps of
    - i) determining the amount of a GPR14 polynucleotide in a sample taken from said mammal,
- 30 ii) determining the amount of GPR14 polynucleotide in healthy and/or diseased mammals.

- 19. A pharmaceutical composition for the treatment of a disease comprised in a group of diseases consisting of hematological diseases, cardiovascular diseases, disorders of the peripheral and central nervous system, urological diseases, endocrinological diseases and cancer in a mammal comprising a therapeutic agent which binds to a GPR14 polypeptide.
- 20. A pharmaceutical composition for the treatment of a disease comprised in a group of diseases consisting of hematological diseases, cardiovascular diseases, disorders of the peripheral and central nervous system, urological diseases, endocrinological diseases and cancer in a mammal comprising a therapeutic agent which regulates the activity of a GPR14 polypeptide.
- 21. A pharmaceutical composition for the treatment of a disease comprised in a group of diseases consisting of hematological diseases, cardiovascular diseases, disorders of the peripheral and central nervous system, urological diseases, endocrinological diseases and cancer in a mammal comprising a therapeutic agent which regulates the activity of a GPR14 polypeptide, wherein said therapeutic agent is

20

25

30

- i) a small molecule,
- ii) an RNA molecule,
- iii) an antisense oligonucleotide,
- iv) a polypeptide,
- v) an antibody, or
  - vi) a ribozyme.
- 22. A pharmaceutical composition for the treatment of a disease comprised in a group of diseases consisting of hematological diseases, cardiovascular diseases, disorders of the peripheral and central nervous system, urological

diseases, endocrinological diseases and cancer in a mammal comprising a GPR14 polynucleotide.

23. A pharmaceutical composition for the treatment of a disease comprised in a group of diseases consisting of hematological diseases, cardiovascular diseases, disorders of the peripheral and central nervous system, urological diseases, endocrinological diseases and cancer in a mammal comprising a GPR14 polypeptide.

5

15

20

30

10 24. Use of regulators of a GPR14 for the preparation of a pharmaceutical composition for the treatment of a disease comprised in a group of diseases consisting of hematological diseases, cardiovascular diseases, disorders of the peripheral and central nervous system, urological diseases, endocrinological diseases and cancer in a mammal.

25. Method for the preparation of a pharmaceutical composition useful for the treatment of a disease comprised in a group of diseases consisting of hematological diseases, cardiovascular diseases, disorders of the peripheral and central nervous system, urological diseases, endocrinological diseases and cancer in a mammal comprising the steps of

- i) identifying a regulator of GPR14,
- disease comprised in a group of diseases consisting of hematological diseases, cardiovascular diseases, disorders of the peripheral and central nervous system, urological diseases, endocrinological diseases and cancer in a mammal; and
  - iii) combining of said regulator with an acceptable pharmaceutical carrier.

5

- 116 -

26. Use of a regulator of GPR14 for the regulation of GPR14 activity in a mammal having a disease comprised in a group of diseases consisting of hematological diseases, cardiovascular diseases, disorders of the peripheral and central nervous system, urological diseases, endocrinological diseases and cancer.
